

## A Compendium of Orchestral Repertoire

This Compendium of Orchestral Repertoire is an interactive document designed to assist working conductors, conducting students and other professionals in the field of orchestral music in the process of accessing, evaluating and absorbing works of the standard orchestral repertoire.

Unlike most orchestral music reference sources, in which orchestral works are sorted alphabetically or chronologically by composer, this compendium is sorted by category of genre as follows:

<p><i>Select the underlined links below to see a list of works in that genre, sorted by composer.</i> <i>Note: This version of the Compendium contains only Overtures, Symphonies &amp; Concertos.</i></p>
<a href="#"><u>Overtures</u></a>
<a href="#"><u>Symphonies</u></a>
<a href="#"><u>Concertos &amp; Other Solo Instrumental Works With Orchestra</u></a>
<a href="#"><u>Tone Poems</u></a>
<a href="#"><u>Suites</u></a>
<a href="#"><u>Operatic Excerpts</u></a>
<a href="#"><u>Ballets &amp; Excerpts</u></a>
<a href="#"><u>Vocal Works with Orchestra</u></a>
<a href="#"><u>Choral Works with Orchestra</u></a>
<a href="#"><u>Works of American Composers</u></a>
<a href="#"><u>Chamber Ensemble Works</u></a>

Sorting a listing of orchestral works by category and composer enables the works to be accessed and/or learned systematically according to their musical genre and programmatic function. The presentation of this information in this way is not intended to replace the process of studying and absorbing the complete works of each composer, but rather to serve as a supplementary aid with specific regard to learning the standard orchestral repertoire.

Many of the works listed in the Compendium are linked via the internet to the website of Naxos.com. Online users of the Compendium whose computer systems have the necessary specifications can listen to complete recordings of hundreds of orchestral works.

By means of this interactive aspect, conductors and students can instantly access recordings and background information on a vast number of

orchestral works. This is an invaluable educational tool for anyone interested in learning the orchestral repertoire.

Working conductors can utilize this resource to formulate programs, reacquaint themselves with works not recently heard, and introduce themselves to unfamiliar works. Works can be replayed any number of times for study or demonstration purposes.

Students can utilize this resource to learn the standard works of the orchestral repertoire by listening and by studying the sorted lists of works.

### The "Standard" Orchestral Repertoire

The determination of which works by any given composer are considered "important" or belong to what might be called "standard repertoire" is very subjective. While it is true that many well-known works are and always will be considered important works of the standard orchestral repertoire, trends in programming and musical taste change over time and vary from place to place. Prior to 1960, the symphonies of Mahler were considered obscure in the United States, but are now considered standard repertoire for every major orchestra. The symphonies of Karl Nielsen are widely known in Scandinavia, but occupy a less important position in the repertoire of orchestras in other countries. The determinations made in this document are based on the following criteria:

- a) availability of scores and parts
- b) availability and number of recordings
- c) relative frequency of performance by orchestras in the United States

While an attempt has been made to be comprehensive and inclusive of the all works that comprise the standard orchestral repertoire, no assertion is being made that the lists of repertoire contained in this document are absolutely complete. This is a work in progress, and is continually subject to additions and updates.
